(54) ELECTRONIC PEN, INDIVIDUAL VERIFICATION SYSTEM AND INDIVIDUAL VERIFICATION METHOD

(57)Abstract:
PROBLEM TO BE SOLVED: To provide an electronic pen, an individual verification system and an individual verification method for easily verifying an individual who is difficult to be inputted by a keyboard or the input of him is weak.
SOLUTION: The electronic pen is provided with a one chip micro-computer 1 having a micro-computer function and a semiconductor storage device and an electrode 2 which is electrically connected to an electrode 3 connected to a bus 4 on the computer. The one chip micro-computer 1 of the electronic pen transmits a pulse showing the peculiar number of the electronic pen to the computer with the insertion of the electronic pen into socket of the computer. The computer recognizes whether the use of the peculiar number of the electronic pen is permitted or not in the computer.
